Education

GL Bajaj Institute of Technology and Management <i>B.Tech Information Technology - 8.13</i>	2023 – 2027
Senior Secondary School - XIIth <i>Central Board of Secondary Education - 88.6%</i>	2022 – 2023
Secondary School - Xth <i>Central Board of Secondary Education - 87.8%</i>	2020 – 2021

Experience

Limetta | Founding Product Developer

- Developed a full-stack e-commerce platform for luxury interior décor for limetta using React 19, Node.js, Express.js, and MongoDB with Framer Motion animations.
- Integrated **Razorpay** for payment processing and **Delhivery Logistics** for order fulfillment, waybill tracking, shipping updates, and automated email receipts via Resend.
- Built customer portals with custom product finishes, search/filtering, cart, wishlist, product reviews, and secure JWT-based authentication.
- Designed an Admin Portal for real-time inventory management, order status tracking (Packed, Shipped, Out for Delivery), and cloud media storage via **ImageKit API**.

Skills

Programming Languages: C++, JavaScript, Python

Frontend: React.js, Tailwind CSS, HTML5, CSS3

Full Stack Development: Node.js, Express.js, REST APIs

AI/ML: Scikit-learn, PyTorch, NumPy, Pandas, LLMs, LangChain, RAG, Prompt Engineering

Databases: MySQL, MongoDB, Redis, Pinecone, ChromaDB

Developer Tools: Git, GitHub, Postman, Linux

Projects

CareerPilot

<https://github.com/chestasolanki/CareerPilot.git> 🔗

- Built an AI-powered interview preparation platform that analyzes a candidate's resume (PDF), job description, and self-description to generate personalized interview reports.
- Developed a document processing pipeline to extract resume text and leveraged LLM-based semantic analysis to calculate a match score, identify skill gaps, and generate role-specific technical and behavioral interview questions with answer guidance.
- Designed an AI-driven preparation engine that creates personalized multi-day interview preparation plans based on the candidate's profile and target job requirements.
- Tools Used: React.js, Node.js, Express.js, MongoDB, JWT, Multer, PDF-Parse, Gemini API, Scss.

PrepAI

<https://github.com/chestasolanki/PrepAI> 🔗

- Built a full-stack AI interview prep platform with React.js, Node.js, Express.js, MySQL, including auth and role-based access.
- Built analytics dashboards visualizing performance trends, topic-wise strengths/weaknesses, and company-wise coverage.
- Developed RESTful APIs for users, interview workflows, question banks, and tracking, on a normalized, query-optimized MySQL schema.
- Tools Used: React.js, Node.js, Express.js, MySQL, REST APIs, Tailwind CSS.

Craftly

<https://github.com/chestasolanki/Craftly> 🔗

- Developed an AI website generation platform that turns natural language prompts into functional websites using Llama 3.3 70B via the Groq API, with a structured pipeline producing consistent, multi-file HTML/CSS/JS output.
- Implemented real-time LLM streaming with Server-Sent Events (SSE) and automated backend file creation for a live preview.
- Built the backend with Node.js/Express.js, exposing REST APIs for prompt submission, generation status, and preview retrieval.
- Tools Used: Groq API, Llama 3.3 70B, Prompt Engineering, Node.js, Express.js, REST APIs, SSE, HTML/CSS/JS.

Certifications

- AWS** – Machine Learning Foundations
- Palo Alto** – Cloud Security Automation & Network Security Operations
